- L. The NGB in Belgrade has informed the Yagoslav Government that a large anti-Communist organization exists in the Yagoslav Array.
- 2. This organization comprises a group of Staff Officers whose object is "to paralyze the Yugoslav preparations on Italian territory". The activities of these saboteur officers are the more dangerous because Yugoslav agents in the ranks of the Italian Army and Security Services are known to them.
- 3. The MB discovered this organization while observing Yugoslav Army proparations for aiding, in case of necessity, Italian Communists. Yugoslav leaders are considerably perturbed by the discovery.
- 4. Tito has allegedly given orders for a discreet investigation of the matter, and for the Army to be cleansed of unreliable elements.
